PROFESSIONAL SUMMARY

Full-stack software developer and Computer Science student at the University of Sydney, specialising in end-to-end web and systems development across React, Node.js and Python. Proven track record shipping production systems, winning competitive hackathons, and delivering real business impact as a solo developer. Seeking software engineering internships to contribute to production systems and deepen expertise in systems design and large-scale architecture.

EDUCATION

Bachelor of Advanced Computing

Jul 2024 – Jul 2028

The University of Sydney

WAM: 81.75 | Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, OOP, OS & Network Platforms, Distributed Systems, Systems Programming, Data & Information Management

EXPERIENCE

Full-Stack Developer – Yogi Foods

Jan 2026 – Present

- Building a production-grade B2B/B2C e-commerce platform from scratch (React, Node.js/Express, MySQL, sub-2s page load), replacing a no-code website builder to give the business full control over features, integrations, and UI.
- Integrating Stripe for card payments, custom invoice generation (swissqrbill), and OAuth 2.0 social login, handling end-to-end authentication and payment flows.
- Deploying via Docker on AWS with Nginx reverse proxy, owning the full infrastructure stack from local development to production.

Chess Coach – Sydney Academy of Chess

Aug 2025 – Present

- Coaching primary school students; 20+ taught to date by communicating complex concepts simply and adapting teaching methods to different learning styles.

Software Developer – e12.io

Mar 2025 – Jan 2026

- Built the first functional user-facing interface for a production IoT platform: full-stack, JWT/OAuth 2.0, MySQL, multi-user access control.
- Engineered Node.js REST APIs serving as the sole live data layer between IoT devices and the application.
- Delivered Svelte dashboards enabling real-time data visualisation and user onboarding on a live system.

INDEPENDENT PROJECTS

EcoTrace – AI-powered environmental impact analyser

Aug 2025

Python · FastAPI · Ollama · SQLite

- Won Most Innovative AI App at HackNode Australia 2025 – designed and built end-to-end as a solo developer.
- AI-powered EcoScore engine using a locally hosted LLM (Ollama), barcode scanning (OpenCV, pyzbar), web scraping (BeautifulSoup4), and REST APIs for product lookup and history tracking.
- React + Next.js frontend with Chart.js data visualisations and mobile-first design.

Australian Chess Championships 2026 Website

May 2025 – Jan 2026

WordPress · australianchampionships.usydchessclub.org

- Built the sole online presence for a national tournament: production-ready site that served 31k+ requests from 2k+ users weekly across Australia and overseas.

PortalPaths – Maze Multiverse – 2D procedural maze game

Dec 2024 – Mar 2025

C++ · Raylib · tanishakothari.itch.io/portalpaths

- Publicly released on itch.io for Linux: procedural maze generation, dynamic difficulty scaling, multiple themes, powerups, timed/untimed modes, and leaderboard tracking, built solo in C++.

COMPETITIONS & AWARDS

HSIL Hackathon 2026 – Solely (AI Diabetes Screening Tool)

Apr 2026

- Proposed an AI foot-imaging tool to detect diabetes risk in underserved, non-white populations (up to 4x higher risk) – Placed 4th/17.
- Adapted direction three times under mentor guidance, collaborating across a multi-disciplinary team; final pivot came from recognising a teammate's domain experience and building around that rather than forcing a domain none of us understood.

SYNCS Hack 2025 – Gigimon (Community & Gig Work Platform)

Aug 2025

- Conceived the product idea; led backend development and integration – Won Best First-Year Team Prize.

HackNode Australia 2025 – EcoTrace (AI-driven Sustainability Web App)

Aug 2025

- Built and delivered a full-stack AI platform independently – won Most Innovative AI App.

SKILLS

Programming Languages – Python, JavaScript, C++, Java, SQL

Frameworks & Tools – Node.js, Flask, React, Svelte, HTML/CSS, TailwindCSS, Git/Github, Docker

Concepts – Data Structures & Algorithms, Software Design, OOP, Linux, TCP/IP, Database Design

Soft Skills – Problem solving, Collaboration, Critical thinking, Analytical skill, Adaptability, Leadership

LEADERSHIP & VOLUNTEER EXPERIENCE

General Executive – USYD Chess Club

May 2025 – Present

- Update and maintain club website, showcasing events and weekly meetups.
- Organise events and tournaments and support weekly operations for a club of 500+ members.

ENGO Peer Mentor – The University of Sydney

Feb 2025 – Nov 2025

- Mentored first-year engineering students through the academic and social transition to university, providing support across coursework and campus life to help them settle in smoothly.
