EDUCATION

Bachelor of Advanced Computing
The University of Sydney

July 2024 – Present

EXPERIENCE

Software Developer – e12.io

March 2025 – Present

- Engineering a full-stack IoT data platform with JWT/OAuth authentication and MySQL integration.
- Developing and integrating scalable Node.js APIs, ensuring security and multi-user access control.
- Designing interactive dashboards with Svelte to support onboarding and data visualization features.

Chess Coach – Sydney Academy of Chess

August 2025 – Present

- Coaching primary school students, focusing on tactical and strategic improvement.
- Developing fun and interactive lesson plans to teach the fundamentals of chess to young learners.

INDEPENDENT PROJECTS

Australian Chess Championships 2026 Site (WordPress) (australianchampionships.usydchessclub.org)

- Built the Australian Chess Championships 2026 website, serving 31k requests from 2k users weekly.
- Designed a responsive, production-ready site used by players nationwide and internationally.

EcoTrace – AI-powered environmental impact analyser (Python, FastAPI, SQLite)

- AI-powered product environmental impact analyser with an EcoScore and factor breakdown using FastAPI, SQLite, and Ollama3.
- Added barcode scanning (OpenCV, pyzbar), web scraping (BeautifulSoup4), and REST APIs for analysis and history tracking.
- Developed a React + Next.js frontend with Chart.js data visualisations and mobile-first design.

ExploreEase – AI personalised itinerary generator (Python, Flask, PostgreSQL) (exploreease-w7ps.onrender.com)

- Implemented secure authentication, AI-based itinerary creation, and profile management.
- Designed responsive web UI and optimised server-side logic for faster API responses.

PortalPaths – Maze Multiverse – 2D procedural maze game (C++, Raylib) (tanishakothari.itch.io/portalpaths)

- Designed and developed a procedurally generated maze game with dynamic difficulty scaling.
- Implemented leaderboard tracking and various interactive mechanics to enhance replayability.

COMPETITIONS & AWARDS

SYNCS Hack 2025 – Gigimon (Community & Gig Work Platform)

- Led backend development and backend–frontend integration.
- Contributed to frontend design and conceived the core idea.
- Won Best First-Year Team Prize.

HackNode Australia 2025 – EcoTrace (AI-driven Sustainability Web App)

- Developed EcoTrace independently into a full-stack sustainability platform.
- Won the Most Innovative AI App prize.

AllUni Programming Competition 2025

- Collaborated in a 3-person team to solve complex algorithmic problems under time constraints.

SKILLS

Programming Languages – Python, JavaScript, C++, Java, SQL

Frameworks & Tools – Flask, Svelte, Node.js, React, HTML-CSS, TailwindCSS, Bootstrap, Git, Github

Concepts – Data Structures and Algorithms, Object-Oriented Programming, Probability and Logic

Soft Skills – Problem solving, Collaboration, Critical thinking, Analytical skill, Adaptability, Leadership

CERTIFICATIONS

Advanced React, Scrimba

December 2025

Electronic Arts Software Engineering virtual experience program, Forage

November 2024

CS50x, by Harvard University

April 2024 – May 2024
